

GET TO KNOW BIG ASS FANS

EST. 1999 IN LEXINGTON, KENTUCKY

Big Ass Fans has always had one goal: to build the best fans for the hardest working people. Big Ass Fans keep you up to 10° F cooler, but they also lower winter heating costs, reduce A/C usage and improve worker safety. Available in diameters ranging from 18 inches to 24 feet, Big Ass Fans are manufactured in Kentucky using industrial-strength components, and backed up by the best warranties in the business.

OUR STORY

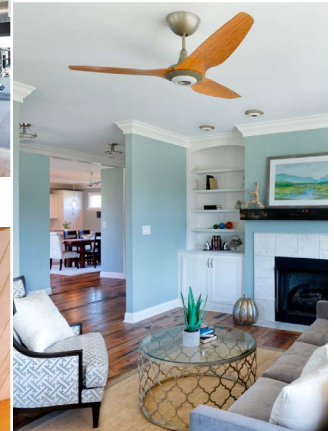

Big Ass Fans began its life as The HVLS Fan Company, named for the high-volume low-speed fans we offered. While the name wasn't catchy, our highly effective fans caught the eye of farmers, who used them to improve dairy cows' productivity by keeping them cool. It wasn't long before the non-bovine were clamoring for our fans' cooling power, and in 2003 we changed our name to reflect what customers were calling our products: Big Ass Fans.

Since then, we've pioneered whisper-quiet fans for commercial spaces, developed directional fans and launched a residential fan brand, Haiku. Not bad for a 19-year-old, eh?
